

Cookie and Storage Policy

Version 2.0 · 29 October 2026 · [Download as PDF](#)

1. Who the controller is

Chun-Feng Pai, operating as Cuenta & Cocina. Tax ID (NIF) Y3566474Q.
Email: info@cuentaycocina.co. More details in the **Legal Notice** and the **Privacy Policy**.

2. What this policy covers

Cookies and any other way of storing or reading information in your browser, such as local storage (`localStorage`) and session storage (`sessionStorage`). The law treats them the same as cookies.

3. In short

- **No cookies of our own:** neither the website cuentaycocina.com nor the application uses cookies of its own.
- **No analytics, advertising or profiling:** we use no analytics or advertising tools, and we build no profiles.
- **Only what is necessary:** we store in your browser only what is essential for them to work, and the preferences you choose.
- **That is why there is no cookie banner:** we don't need your consent or to show you a cookie notice.

4. On the website cuentaycocina.com

Name

cc-lang

What for

remembering the language you choose

Type

local storage

When it is stored and how long it lasts

only when you choose a language; it lasts until you change it or clear your browser data

Who sets it

us

It contains no personal data.

5. In the application (cuentaycocina.app)

Name

sb-...-auth-token and _auth_session_shadow

What for

keeping you signed in securely

Type

session storage; local storage only if you tick "Keep me signed in"

How long it lasts

until you close the browser or, if you ticked the box, until you sign out

Personal data

yes: your identifier and your email

Name

pendingPasswordReset

What for

completing the password change you asked for

Type

local storage

How long it lasts

until you finish the change

Personal data

no

Name

language

What for

remembering your language

Type

local storage

How long it lasts

until you sign out

Personal data

no

Name

activeRestaurantId

What for

remembering which restaurant you have open

Type

local storage

How long it lasts

until you sign out

Personal data

no

Name

menuOptimizerData , menuOptimizerSettings , menuOptimizerMenuCategories ,
lastAnalysisDate... , lastAnalysisResult...

What for

a working copy of your restaurant's data, so that the app runs fast

Type

local storage

How long it lasts

until you sign out

Personal data

supplier names may appear

Name

costAlertsAcked_... , invoiceOnboardingSeen

What for

remembering the notices and tips you have already seen or dismissed

Type

local storage

How long it lasts

until you sign out

Personal data

no

Name

pending_credits_session

What for

completing a credits purchase when you come back from Stripe

Type

session storage

How long it lasts

until you come back from the payment

Personal data

no

Name

pending_extra_restaurant_name

What for

remembering the name of the restaurant you are adding while you pay at Stripe

Type

session storage

How long it lasts

until you come back from the payment

Personal data

no

Name

weighted_saved_...

What for

remembering that you already saved that week's weighted prices

Type

session storage

How long it lasts

until you close the tab

Personal data

no

Keys from earlier versions: the app no longer writes `milestones_...`, `analytics_consent`, `cookieConsent`, `show_onboarding` or `trial_ends_at`. If any is left in your browser, the app deletes it when you sign out.

When you sign out, the app deletes all of the above, including when the session ends on its own after inactivity (15 minutes).

6. Stripe

Payment does not happen on our pages:

- **Where:** payments and subscription management happen on Stripe's pages (checkout.stripe.com and billing.stripe.com), which we open from the app.
- **What Stripe stores:** on those pages, Stripe uses its own cookies, under its cookie policy (stripe.com/legal/cookies-policy).
- **On our pages, none:** we load no Stripe code, so Stripe stores nothing on our website or in the app.

7. Emails

The emails we send you **carry no tracking pixels or tracking links**: we don't know whether you open them or which links you click.

8. How to delete what is stored

- **In the app**: sign out and everything is deleted.
- **At any time**, you can delete a site's storage from your browser's settings:
 - **Chrome / Edge**: Settings → Privacy and security → Cookies and other site data → See all site data.
 - **Firefox**: Settings → Privacy & Security → Cookies and Site Data → Manage Data.
 - **Safari**: Settings → Privacy → Manage Website Data.
- **If you block this storage**: you won't be able to sign in, and the website won't remember your language.

9. Where the data goes

What we store in your browser stays on your device. **What we process on our servers** is explained in the Privacy Policy.

10. Changes

If we ever used anything that is not strictly necessary, such as an analytics tool, **we would ask for your consent first** and update this page.

11. Languages

This policy is in Spanish, Catalan and English, with the same content and the same date.

History:

- **Earlier versions**: [Version 1 \(PDF\)](#).

- **2.0, 29 October 2026:** new wording. There are no analytics tools or cookie notice any more, and the real keys of the website and the app are listed.
